■ Start a video call with your JVU430

Ensure your PC, Mac®, or Chromebook[™] has Internet service, and that both you and the person you need to call are using a video calling application (e.g. Zoom[™], Microsoft Teams[™]). Select the correct video device and microphone in the settings menu in the video calling application.

- 1. The JVU430 provides Ultra HD 4K video calling, with a minimum of 8 Mbps
- upload speed. 2. 4K calling may be affected by available network bandwidth, CPU speed,
- type of video calling application, etc. 3. Wide Compatibility: Zoom™, Facebook™ Messenger, Skype™, Microsoft Teams™, Google™ Hangouts™, etc.
- For Windows® 10
- Go to Start > Settings > Privacy > Camera/Microphone
 Choose your preferred settings to allow apps to access your camera and
- microphone. 3. Turn on your camera and microphone from within the settings of your video calling application.

Privacy settings for macOS®

- 1. On your Mac[®] choose the Apple[®] menu > System Preferences, click Security & Privacy, then click Privacy.
 Select Camera/Microphone.
 Select the checkbox next to an app to allow it to access the camera and
- uncophone. Deselect the checkbox to turn off access the tamp if you turn off access for an app, you will be asked to turn it on again the next time that app tries to use your camera or microphone.

Special Notes

1. To prevent & eliminate microphone/audio feedback, the recommended distance between the microphone and the speaker is 5 to 10 ft. depending on the space and layout of your area. 2. Designed with medium to large groups in mind.
